PROFESSIONAL SUMMARY

Full-stack software engineer with proven experience in mission-critical, high-volume enterprise systems (1M+ records). Initiated and led the multi-stage modernization of CREA-PI's core platform — from JDK 6/7, JSF/PrimeFaces 3.1 and GlassFish 3.1 to JDK 17, Jakarta EE 10, PrimeFaces 15 and Payara 6 — while keeping a live production system running (~250k lines, 2,300+ classes) with zero downtime. Solid background in REST/SOAP APIs, FastAPI, Node.js/NestJS, Angular/React, financial integrations (PIX), information security and applied AI (RAG, automation, decision support). Currently seeking full-time or contract opportunities abroad — .open to relocation and remote-first roles worldwide, spanning fintech/banking, government and regulatory bodies, legal-tech, legacy system modernization, applied AI/RAG platforms, and security-conscious backend engineering more broadly."

PROFESSIONAL EXPERIENCE

Technology and Information Security Advisor | CREA-PI

05/2024 – 07/2026

Teresina, Brazil

- **Core system modernization:** initiated and led the multi-stage migration of an enterprise system (~250k lines, 2,300+ classes) — JDK 6/7 + PrimeFaces 3.1/5 + GlassFish 3.1/4.1 → JDK 8 + PrimeFaces 6–13 + GlassFish 5.1/Payara 5 → JDK 17 + Jakarta EE 10 + PrimeFaces 15.0.6 + Payara 6 — keeping the transactional system live in production.
- **Modern services layer:** designed and built REST/SOAP services in Java/Jakarta EE, Python/FastAPI and Node.js/NestJS, plus Angular and React dashboards integrated with the Java transactional core.
- **Financial integrations:** implemented a PIX module with dynamic QR Code generation and bank confirmation webhooks (HMAC-SHA256 signature validation) with idempotency and audit trails.
- **Applied AI:** architected and built generative AI solutions, RAG pipelines, document analysis, inspection tooling and decision-support systems.
- **Security & automation:** vulnerability assessment and mitigation, JWT/OAuth 2.0, API hardening, Linux, Docker, Nginx, CI/CD, monitoring, plus process automation and high-volume data-loading routines via Shell Script.

Technologies: Java/Jakarta EE, JDK 17, JSF/PrimeFaces, JPA/Hibernate, Payara, Python/FastAPI, Node.js/NestJS, Angular, React, PostgreSQL, Docker, Linux, Shell Script.

Java Full Stack Developer | EDM Software

05/2022 – 09/2022

Florianópolis, Brazil

- Developed, maintained and fixed bugs across Java full-stack systems built with JSF/PrimeFaces, JPA/Hibernate and SQL.
- Integrated SOAP/REST web services and Brazilian fiscal documents (NF-e/NFC-e); handled support tickets and delivered improvements.

Technologies: Java 7/8, JSF (PrimeFaces), JavaScript, JPA, Hibernate, Tomcat, SQL, Web Services (SOAP/REST), NF-e/NFC-e.

TECHNICAL SKILLS

Backend: Java, Jakarta EE, Spring Boot, Python, FastAPI, Node.js, NestJS, REST, SOAP.

Frontend / Mobile: Angular, React, TypeScript, JSF, PrimeFaces, Flutter.

Data Stores: PostgreSQL, MongoDB, SQL, JPA/Hibernate.

DevSecOps: Git, Docker, Kubernetes, Linux, Nginx, CI/CD, JWT, OAuth 2.0, AWS.

AI & Data: RAG, LLMs, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy.

Architecture: Microservices, SOA, messaging, idempotency, auditing, clean code.

EDUCATION

B.Eng. in Computer Engineering — Estácio | 08/2026 – Present

Complementary training: Web Programming, OOP in Java, Linux Networking & Support — Federal Institute of Santa Catarina (IFSC) | 2016 – 2021

LANGUAGES

English: Intermediate — solid technical reading and written communication;

Portuguese: Native.
